Subject: Errata to Environmental Report for Hematite Decommissioning (License No. SNM-00033, Docket No. 070-00036)

Reference: Westinghouse (E. K. Hackmann) letter to NRC (Document Control Desk), HEM-09-94, dated August 12, 2009, "Decommissioning Plan and Revision to License Application"

As I have recently discussed with Mr. John J. Hayes, the Environmental Report submitted with the referenced letter mentioned an appendix with accident analysis information. That appendix was not included since it was not needed. Therefore, attached please find Environmental Report errata page vii (in the Table of Contents) and page 4-20 (in section 4.12.2.2) to delete mention of the appendix.

If you have any questions concerning this topic, please contact me at your convenience.

A review of decommissioning activities has been conducted to develop a list of reasonably foreseeable (e.g., credible) accidents with a potential for releases to the environment, and to analyze the dose consequences from such accidents. These offsite dose consequences were then compared to the current license-basis requirement of complying with the provisions of 10 CFR 70.22(i)(1)(i).
