Dear Bryan,

Per our conversation I have made additions to the biography for our William Elliott. Please let me know if this covers what we talked about. We appreciate your help on this.

Best Regards,

144302

NISS/RCN1 MATERIALS-002

TECHNET GROUP

William T. Elliott

Mr. Elliott has worked in the machine tool manufacturing industry his entire 30 + year career. His previous positions included machinist, machine shop supervisor and manufacturing methods engineer. He began work at I2S in March of 2006 as a manufacturing engineer. William joined the Radiation Safety Committee in April of 2009. His responsibilities as our Corporate Safety Director gave him sufficient background to provide proper input as regards to the compliance of proper safety procedures in our manufacturing areas. In addition, his machining background and quality assurance skills provide him with the necessary skill set with which to take on the responsibilities of assuring full compliance with necessary quality checks and documentation for the manufactured components of our isotope thickness gauges.

At no time will Mr. Elliott be involved in the handling of isotope materials. His role in the radiation program will be confined to quality assurance and interface to our company wide safety program and practices.

William's current responsibilities include production control manager, management of the I2S general safety program as well as environmental compliance. To assist him in his responsibilities regarding the I2S radiation program he has successfully completed a 40 Hour Radiation Safety Officer Course. Copy of his certificate previously submitted.
