Chris,

In response to your reporting to Transnuclear (TN) that our requested May 1, 2010 approval of our December 23, 2009 application for renewal/revision of the CoC 9217 ANF-250 transportation packaging would be difficult for the NRC based on current resources and schedules, and your subsequent inquiry as to whether splitting the renewal aspects from the revision aspects might help the renewal timing situation, TN offers the following:

- TN very much appreciates this interaction and the NRC suggestions and flexibility.
- TN believes that an additional month of review, with approval by June 1, 2010, would still allow the time needed for our interactions with DOT and the multiple foreign competent authorities for re-certifications and revalidations necessary for the shipments after September 1, 2010.
- Based on past interactions with certain foreign competent authorities, revalidation timing will be greatly improved by the requested clarification of the ANF-250 CoC Contents section, which is based on the included criticality analysis, and therefore splitting the renewal aspects from the revision aspects of our application will not provide an overall schedule benefit for our transportation needs.

Regards,

Don Shaw
