DOE has not asked for any modifications to the alternate feedstock specifications. However, depending on what they plan on processing at the MFFF later, it is likely that some changes will be requested in the future. I am not sure if the PuP specifically makes this more likely. I can make some inquiries with Sam Glenn to find out if he knows anything about this.

<http://www.aikenstandard.com/Local/1211PuP>

Is PuP within the scope of the anticipated feed stocks or does this raise the specter of alternate feed materials?
