Marlton, NJ 08053

SUBJECT: ACCEPTANCE REVIEW OF LICENSE AMENDMENT REQUEST NO. 8 TO  
HOLTEC INTERNATIONAL HI-STORM 100 CERTIFICATE OF COMPLIANCE  
NO. 1014 (TAC NO. L24398)

Dear Ms. Morin:

By letter dated November 28, 2009, Holtec International (Holtec) submitted a license amendment request to the U. S. Nuclear Regulatory Commission (NRC) for the HI-STORM 100 Certificate of Compliance (CoC) No. 1014. The proposed amendment request seeks to

- 1) add a new multi-purpose canister (MPC) – 68M to the approved models presently included in CoC No. 1014 with two new boiling water reactor fuel assembly/array classes,
- 2) add a new pressurized water reactor fuel assembly array/class to CoC No. 1014 for loading into the in the MPC-32, and
- 3) provide the definition 'METAMIC' in CoC No. 1014 and associated technical specifications to include both classic and Metamic-HT materials.

The purpose of this letter is to provide the results of the NRC staff's acceptance review of this license application. The acceptance review was performed to determine if there is sufficient technical information in scope and depth to allow the NRC staff to commence its detailed technical review. The acceptance review is also intended to identify whether the application has any readily apparent information insufficiencies in its characterization of the regulatory requirements or the licensing basis of the HI-STORM 100 Dry Cask Storage System.

The NRC staff (staff) has reviewed your application and concluded that it does provide technical information in sufficient detail to enable the staff to complete its detailed review and make an independent assessment regarding the acceptability of the proposed amendments in terms of regulatory requirements, and the protection of public health and safety, and the environment. The staff will commence its detailed review of the application and is targeting a completion date of October 1, 2010.

T. Morin
