Docket No. 50-247

Mr. Terry Wilson, Chairman
Croton Ecology Group
182 Cleveland Drive
Croton, New York 10520

Dear Mr. Wilson:

I am pleased to respond to your letter to the President expressing concern about the Indian Point Station, particularly that a public hearing should be held before an operating license is issued for Unit 2.

Enclosed is a copy of the AEC's Notice of Hearing for Indian Point 2 which sets forth the time and place of the hearing, and the procedure by which a member of the public may participate in the hearing either as a party or by means of a limited appearance.

I also am enclosing a copy of 10 CFR Part 2, the Commission's "Rules of Practice," which sets forth the various procedures applicable to the conduct of public hearings. I would invite your attention in particular to section 2.714, 2.715 and Appendix A.

Sincerely,

Peter A. Morris

Peter A. Morris, Director
Division of Reactor Licensing

162 Cleveland Dr.
CROTON-ON-HUDSON
New York, 10520

President Richard M. Nixon
White House
Washington, DC.

Dear President Nixon:

The present atomic energy plant at INDIAN POINT is inefficient in disposal of hot water, (used for cooling) also for disposal of its excess radiation. We feel that a 2nd plant doing this just as inefficiently is not called for at this moment.

The Ecology group of CROTON feels that the Atomic Energy Commission should hold OPEN HEARINGS on the topic of the #2 INDIAN POINT PLANT'S license to operate.

Sincerely yours,
Jerry Wilson
(Chairman of Ecology group
of CROTON.)
