DEC 16 1966

Docket No. 50-247

Honorable Richard L. Ottinger
House of Representatives

Dear Mr. Ottinger:

This is in response to your referral of November 21, 1966, which enclosed the statement, "The Time-Bomb at Indian Point," by Mary Hays Weik, secretary of the Committee to End Radiological Hazards, New York City.

This statement was presented by Miss Weik on September 14, 1966, at Buchanan, New York, in a limited appearance before the atomic safety and licensing board during its public hearing in the matter of the Consolidated Edison Company's application for authority to construct its Indian Point Nuclear Power Station Unit No. 2. Her statement was incorporated in the transcript of the proceeding. The board also heard further amplifying remarks which she presented orally on the record. During the course of the hearing, the board referred to Miss Weik's statement in asking questions of the parties.

Following its consideration of all the evidence and testimony presented in the proceeding, the board on October 3, 1966, issued an initial decision granting the request for a provisional construction permit. A copy of the decision is enclosed for your information. The permit was issued by the AEC on October 14, 1966.

On October 14, 1966, the Conservation Center, Inc., filed an "Appeal from Initial Decision, Exceptions and Brief in Support Thereof." Responses were filed by the applicant and the regulatory staff opposing the appeal. The matter is now pending decision before the Commission.

In keeping with the AEC's rules in licensing proceedings,
