Re: Consolidated Edison Company
of New York, Inc.
Indian Point Station Unit No. 2
AEC Docket No. 50-247

Dear Mr. Macbeth:

ARVIN E. UPTON

EUGENE B. THOMAS, JR. LEONARD M. TROSTEN WASHINGTON PARTNERS

This is in response to your letter dated May 7, 1971.

As you know, your letter reflects the conditions which we agreed upon as the result of discussions concerning the environmental monitoring program for the Indian Point site.

Con Edison is agreeable to the conditions contained in the third through sixth paragraphs of your letter.

Sincerely yours,

himsel M. Traction

In Re: Consolidated Edison Company of New York, Inc.
Indian Point Station Unit No. 2

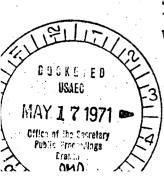

AEC Docket No. 50-247

Dear Mr. Trosten:

I am writing on behalf of the Hudson River Fishermen's Association with regard to the matter captioned above.

I have reviewed Section 4.10 of the Technical Specifications, and the Association is particularly interested in being assured that the environmental monitoring survey described therein be maintained throughout the period of the license for Indian Point Unit No. 2 and that all the equipment necessary to the program will be kept in proper functioning order for the thorough performance of the survey.

I understand that from time to time Consolidated Edison or the Atomic Energy Commission may feel it necessary to make alterations in the environmental monitoring survey. It is my understanding that Consolidated Edison will undertake to give the Association direct and timely notice of any proposed change in the requirements of the survey so that the Association may express its views to the Commission, should it feel that its interests would be affected by the proposed change.

Page two Leonard M. Trosten, Esq.

It is also my understanding that Consolidated Edison will undertake to test samples collected by the Association or by its agent. Such samples (a) will be taken in the presence of a Consolidated Edison employee or agent, at Consolidated Edison's option, (b) will be taken at a mutually convenient time on reasonable notice to Consolidated Edison, (c) will consist of four samples per quarter year of Hudson River vegetation, Hudson River bottom sediment or Hudson River fish, or any combination of these, and (d) will be tested in the manner described in Table 4.10-1 of the Technical Specifications.

The testing of these samples will be performed by Consolidated Edison employees or agents using equipment furnished by Consolidated Edison. Consolidated Edison will perform these tests on three days' notice to it, whenever feasible. If the laboratory workload prevents this, Consolidated Edison will notify the Association and advise of the earliest available date on which the tests can be made.

It is also my understanding that the Association may choose to take samples by methods which differ from those described in lines 8, 9 and 10 of Table 11.11-1 of Exhibit B-8, Volume 5 of this docket, the Final Facility Description and Safety Analysis Report, in that samples of vegetation or fish may consist of the particular specie or species available at the sampling point, and that the sampling points chosen for vegetation and sediment may be near Indian Point Unit No. 2 but not necessarily those presently designated by Consolidated Edison for sampling.

I would appreciate receiving from you an assurance on these points. On the basis of this assurance the Hudson River Fishermen's Association will not contest the issuance of an operating license for Indian Point Unit No. 2 on radiological health and safety grounds.

Weus Machen

Angus Macbeth
