Docket No. 50-247

OCT 1 1971

Mr. Angus Macbeth
 Natural Resources Defense
 Council, Inc.
 36 West 44th Street
 New York, New York 10036

Dear Mr. Macbeth:

Your letter of September 7, 1971, to Chairman Schlesinger comments on a letter he received from Mr. Milton Musicus, Chairman, Interdepartmental Committee on Public Utilities of the City of New York, about Indian Point Unit No. 2. I assume you refer to his letter of August 31, 1971, in which he discusses the availability of the nuclear power station during New York City's anticipated peak demand period next summer.

I have replied to Mr. Musicus on behalf of Chairman Schlesinger, and am enclosing herewith a copy of this reply. As you can see, I did not interpret Mr. Musicus' letter to be an attempt to intervene in the licensing proceedings now in progress for the Indian Point Unit No. 2; rather, it seemed to me to be an expression of concern that New York City might have inadequate reserve power should the unit not be available for service next summer. It is in this context that I replied to his letter.

If I may be of further assistance in this matter, please let me know.

Sincerely,

(Signed) H. L. Price

Harold L. Price
 Director of Regulation
