Re: Consolidated Edison Company of
New York (Indian Point, Unit
No. 2) - Docket No. 50-247

Gentlemen:

Enclosed are further questions related to the Emergency Core Cooling System. We do expect both the Staff and the Applicant to respond to these inquiries. In addition, we direct your attention to the critique of the ECCS design criteria prepared by the Union of Concerned Scientists, published in October, 1971 which represents a further statement of our concerns.

Due to the anticipated length of hearings in Vermont Yankee, the Statement of Issues and Proposed Cross-Examination which are due on the 20th of October will not be available until the 25th of October.

Sincerely,

Anthony Z. Roisman
