Washington, D. C. 20036

In the Matter of Consolidated Edison Company of New York, Inc.
Indian Point Nuclear Generating Unit No. 2
Docket No. 50-247

Dear Mr. Roisman:

Enclosed is a list of documents considered in connection with our review of the adequacy of performance of emergency core cooling systems which you requested. The list does not include the titles of published textbooks and standard reference works which were used or consulted.

The furnishing of this list should not be construed as an admission on our part that all or any of the documents listed are relevant to the subject proceeding nor as a waiver of any argument we may wish to assert with respect to the offer in evidence of the list or any of the documents identified therein.

Sincerely,

Myron Karman
Counsel for
AEC Regulatory Staff

In the Matter of Consolidated Edison Company of New York, Inc.
Indian Point Nuclear Generating Unit No. 2
Docket No. 50-247

Dear Mr. Roisman:

Enclosed herewith is a list of documents considered by the ECCS Task Force in their review of emergency core cooling system performance, culminating in the issuance by the Commission on June 19, 1971 of Interim Acceptance Criteria for Emergency Core Cooling Systems for Water Cooled Reactors.

The list includes the titles of documents for which requests have been made to withhold them from public disclosure as proprietary.

The list does not include standard published textbooks and reference works that may have been used for background, or for checking an occasional equation.

The furnishing of this list by the staff should not be construed as any admission on its part that any or all of the material contained therein is relevant to subject proceeding, nor as a waiver of any argument the staff may wish to assert with respect to its introduction into evidence.

Sincerely,

Myron Karman
Counsel for
AEC Regulatory Staff
