Re: Docket No. 50-247  
Indian Point No. 2

OFFICE OF  
HEARING EXAMINERS

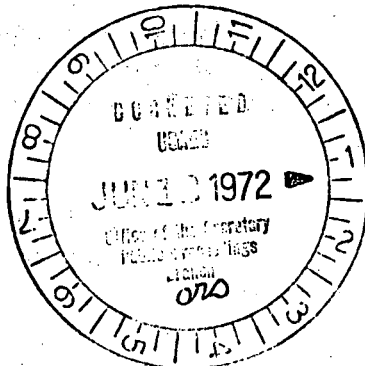

Dear Chairman Jensch:

Enclosed is the package of copies of correspondence and questions I have sent, at your suggestion, to several N.Y. State officials. I have also sent copies of the whole package to the parties in the proceeding, for their information.

Sincerely,

*Alice M. Leighner*

OFFICE OF  
EXAMINERS

Dear Mr. Martin:

In March 1972, I asked to make a limited personal appearance before the AEC Safety and Licensing Board hearing Con Ed's application for an operating license for Indian Point # 2. At that time, Chairman Samuel Jensch suggested that I direct any questions I might have to you.

I apologize for the belatedness of this letter, but I had several personal conflicts and was unable to think through my questions carefully until now.

While talking with numerous Civil Defense people this spring, in the course of developing issues for a local political campaign, I became increasingly concerned about the apparent gaps in communications between State and local CD officials — the ones who would have the awesome responsibility of carrying out emergency action.

I am deeply concerned as to whether plans that might look good on paper would work in an actual emergency. It is my general opinion, which may be erroneous, that CD emergency preparedness is an extremely casual concern — operating on the premise that it will never be needed for a nuclear accident and that if it were, it would be too late anyway.

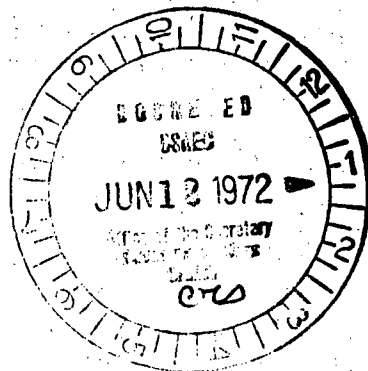

I have enclosed a list of fairly general questions that occur to me. Any comments that you might have on my prepared statement and any answers you can offer to the questions will be deeply appreciated.

Thank you for your cooperation.

Sincerely,

Alice M. Leighner

Questions

1. How are civil defense programs in the state financed? Is there state aid directly to villages, cities and towns as well as counties? I am particularly interested in the following areas: Town of Cortlandt, Town of Yorktown, Peekskill, Yorktown, Croton and Buchanan.
2. What is the level of financial assistance to these areas and to Westchester County and how does it compare with the financial assistance in past years (example: 1967 and 1962)? Does the state still offer matching money to communities that include CD in their budgets? If so, how does a community qualify for state assistance?
3. Are there any training programs now in affect for local civil defense volunteers and if so, what is the extent of such programs?
4. Are there any CD training programs that have been implemented to tell local school officials (public and private) on what to do in the event of a major accident at Indian Point No. 1 and 2?
5. Who has the responsibility of seeing that all CD volunteer directors in Northern Westchester have copies of the State's Emergency Plan?
6. Have any meetings been held between State officials and all Northern Westchester CD people to explain how the plan would work in an actual emergency?
7. Are there any plans for emergency exercises to insure that the State Emergency Plan would work efficiently in an actual emergency situation?
8. By what date will the State Health Department replace Yorktown's 200-bed mobile hospital that was taken back on May 9, 1970?
9. Several CD people mentioned that until they received copies of the N.Y. State Emergency Plan, they would continue to operate under the same plan that was designed for protective action in case of enemy attack. Mightn't the actions be different for a nuclear power plant accident?
10. Are there any plans for educating the general public on what to do in case of an accident at Indian Point No. 2? If so, what are they and when will they be implemented? If there are no plans, why not?
