R. H. Engelken, Assistant Director for Inspection & Enforcement,
Directorate of Regulatory Operations, HQ

CONSOLIDATED EDISON COMPANY, INDIAN POINT NO. 2
DOCKET NO. 50-247

This memo is submitted in accordance with PI 1200/14, dated May 15, 1972, and to provide information of the public hearing relating to an operating license for IP-2 conducted on May 17-19, 1972 in Croton-on-Hudson, New York. Regulatory Operations personnel attending included Messrs. Howard, Tillou, Burzi, Ryan, and Madsen. Mr. Lofy, Parameters, Incorporated, was also present as a consultant to RO:I.

The hearing was conducted principally to discuss outstanding issues associated with the issuance of a 50 percent testing license. Specific subjects discussed included:

1. PECOR allegation.
2. Main steam safety valve modification.
3. Control rod operation problem.
4. Future hearing plans relating to the applicant's motions for operation to 90 percent power and 100 percent power.

RO:I representatives were cross-examined on items 1, 2 and 3.

At the close of this hearing session the parties' attorneys presented their briefs relative to the issuance of a 50 percent testing license.

The next hearing session is tentatively scheduled for June 19, 1972 at which time issues pertaining to a 90 percent license, which would not be duplications of issues to be covered in conjunction with the 100 percent license, are to be considered. The board indicated a desire to proceed on the basis of issuance of a 100% license in that the effects of 90 per-

cent licensing is not much different than at 100 percent. The basic problem for continuation of the 100 percent hearing is that the staff's environmental report is not scheduled for completion until July 19, 1972.
