

Dr. William A. Mills
Acting Deputy Assistant Administrator
for Radiation Programs

Environmental Protection Agency
Parklawn Building
Fishers Lane
Rockville, Maryland 20850

Dear Dr. Mills:

During the public hearing on Consolidated Edison Company's application for an operating license for its Indian Point Nuclear Generating Station, Unit 2, at Croton-on-Hudson, New York, Dr. Gordon Burley of the Technical Assessment Division, and formerly of the AEC, testified on behalf of the AEC regulatory staff.

There is a possibility that the Atomic Safety and Licensing Board conducting the hearing may request some further testimony from Dr. Burley in the near future, and we would appreciate it if you would authorize Dr. Burley to testify when and if his presence is required. The AEC will, of course, prepare travel orders for Dr. Burley, and there will be no financial obligation to EPA.

I have asked Mr. Myron Karman, counsel for the AEC regulatory staff in the Indian Point proceeding, to contact your office within the next few days concerning Dr. Burley's availability.

Sincerely,

L. Manning Muntzing
Director of Regulation
