In the Matter of Consolidated Edison Company of New York, Inc.,  
Indian Point Nuclear Generating Unit No. 2  
Docket No. 50-247

Gentlemen:

Reference is made to letter, dated March 8, 1972, from the Attorney General of the State of New York to the Board opposing the application of Consolidated Edison Company of New York, Inc. for a 50% testing license for subject plant.

The matter of fish kills at the plant site has been thoroughly discussed in the Applicant's Environmental Reports and the Regulatory staff's Discussion and Conclusions on environmental considerations. These reports and statements are part of the evidentiary record in the proceeding, and testimony with respect thereto was adduced at the hearing sessions held on January 11 and January 12, 1972. The Board is in a position to rule on the application, based upon all the evidence and pleadings before it.

Very truly yours,

Myron Karman  
Counsel for AEC Regulatory Staff
