Dear Mr. O'Reilly:

In response to your letter of December 1, 1972 to Mr. William W. Lapsley, a review is under way with regard to the specific valve operators referenced in your letter. It is expected that this review will be completed in early February, and that the information requested may be submitted to you by the end of February, 1973.

Appropriate modifications, if any, resulting from this review will be completed prior to initial criticality of the reactor.

Very truly yours,

*William J. Cahill, Jr.*
