

that motion to reconsider be denied by the Board, the Applicant moved "in the alternative that the Board clarify its ruling...."

The regulatory staff's position regarding the consideration of the environmental impacts on the Hudson River by the Roseton and Bowline plants, and its reasoning to support that position, was stated in its filing of November 3, 1972. Therein the staff stated its belief that the National Environmental Policy Act of 1969 does not require the inclusion of the environmental impact of the Bowline and Roseton plants in this proceeding, but that if "during the course of the upcoming hearings on environmental matters encompassed by Appendix D and in issue among the parties, the Board determines that additional testimony is warranted, it has not only the authority but the obligation to assure that an adequate decisional record is developed."

The Board requested that the information be furnished it, however, and after it was produced by the staff, it was ordered into the record of the proceeding, as related above. Because the Board has determined that the supplemental evidence is necessary for inclusion in the record in order to decide those matters which are in controversy among the parties, and to assure the development of an adequate decisional record, the supplemental evidence should not be stricken.

The staff certainly would not object to any action by the Board, if it so desires, to further clarify its rulings on the record.

Respectfully submitted,

  
Myron Karman  
Counsel for AEC Regulatory Staff
