RE: Indian Point Unit No. 2  
Docket No. 50-247

Dear Mr. Rusche:

Consolidated Edison Company of New York, Inc., (Con Edison) hereby submits additional information relating to the report "Economic and Environmental Impacts of Alternative Closed-Cycle Cooling Systems for Indian Point Unit No. 2."

Supplement No. 1 to the report was submitted on August 6, 1975 in response to a request for additional information made by Mr. George W. Knighton in his letter to Con Edison of July 10, 1975. This submittal includes responses to Questions III.12, III.15, III.25 and III.27 which, as we have previously advised you, required more time to prepare than the responses submitted on August 6, 1975. Also enclosed is a typographical correction to the response to III.3 and instructions for handling this material.

In accordance with Mr. Knighton's letter, we attach three (3) signed originals and thirty-seven (37) copies of this submittal.

Very truly yours,

A handwritten signature in cursive script, appearing to read "William H. Hall, Jr.".
