U. S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Attention: Director, Division of Site  
Safety and Environmental Analysis

Dear Sir:

On April 15, 1976, this Commission responded to the Draft Environmental Statement on the Preferred Closed Cycle Cooling System for Installation at Indian Point Nuclear Generating Unit No. 2, Docket No. 50-247.

Since that time, more data has been received by this office as to the impact this project will have on the environment.

What I would like to know at this time is whether or not there will be public hearings before a final commitment is made, and if so, where and when.

Thank you.

Sincerely yours,

DAVID P. McCOY  
Senior Landscape Architect
