Subject: Transfer and Corrective Report Regarding 14 Tritium Exit Signs

Dear Dr. Miller:

Pursuant to 10 CFR § 31.5(a), Wal-Mart Stores, Inc. ("Wal-Mart") is a general licensee of the NRC because it possesses and uses byproduct material in the form of tritium exit signs ("TES"). Wal-Mart has recently discovered the 14 TES described in Attachment A.

One of those TES was discovered in a New Jersey store, and Wal-Mart has included information about that sign because New Jersey was not an Agreement State when Wal-Mart submitted its TESIP report to the NRC. New Jersey has since become an Agreement State, thus, Wal-Mart is providing a copy of this letter to the New Jersey Radiation Protection Program for its information.

Six of the 14 TES listed in Attachment A were also included in Wal-Mart's previous reports of lost TES. This notice therefore serves to correct those reports with respect to 6 TES, and to report that the new total number of lost TES in non-Agreement States (for this purpose, including Virginia and New Jersey) is 2395.

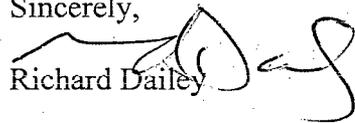

In addition, on the dates indicated on the attached table, Wal-Mart transferred the TES from the Wal-Mart stores indicated therein to Isolite Corporation, a specific licensee authorized to receive such devices, which took possession of the devices at the Wal-Mart store location. Accordingly, pursuant to 10 CFR § 31.5(c)(8)(ii), Wal-Mart herein provides notice of those transfers.

JSMEIO

Please contact me at (479) 204-9914, if you have any questions regarding this letter.

Sincerely,

Richard Dailey

Radiation Safety Officer
Wal-Mart Stores, Inc.
