Re: Consolidated Edison Company  
of New York, Inc.  
(Indian Point Unit No. 2)  
Docket No. 50-247

Gentlemen:

In response to Chairman Jensch's letter dated December 20, 1976, we enclose motions to correct the transcripts of the hearings with respect to (1) the designation of a preferred alternative closed-cycle cooling system for Indian Point Station, Unit No. 2, and (2) the request to extend the period of interim operation with once-through cooling until May 1, 1981. A certificate of service is attached.

While we hope we will not want to submit any objections to the transcript corrections proposed by other parties, we respectfully note that the three-day period provided by the Chairman's letter for the submission of such objections may be insufficient, in view

of the holidays and the likelihood that some or all of the parties' corrections may be served by mail. We therefore request that this period be extended to five (5) days from service of such proposed corrections, with the customary allowance for service by mail as provided in the Commission's Rules of Practice.

Very truly yours,

  
Leonard M. Trosten
