ORGANIZATION TN and Calvert Cliffs				
SUBJECT Discussion of use of ANSYS in the CC amendment request 9 structural evaluation				
SUMMARY <i>(Continue on Page 2)</i> Participants NRC John Goshen, Christopher Cook, Ata Istar, David Tang Calvert Cliffs Pat Furio, Ray Wright, Phil Wengloski, John Massari, Loyd Wenger, Jim Wood TN Raheel Haroon, Peter Shih, Sue Buyaskas, Jayant Bondre The NRC staff discussed utilization of ANSYS to perform the structural analysis to support the amendment. Although not necessarily improper, ANSYS in this application has not been benchmarked. If Calvert Cliffs wishes to proceed forward with the existing analysis, in all likelihood, a significant number of RAIs would have to be written. This will extend the review time. If Calvert Cliffs decided to utilize another method that has been benchmarked, such as LS- DYNA, then the review could be performed in substantially less time. Calvert Cliffs stated that they would notify the staff during the week of 1/11/2010 with their decision.
