Chairman
U.S. Nuclear Regulatory Commission
Washington, DC 20555.

Dear Sir:

We strongly urge you to expedite the safety hearings on the Indian Point Nuclear Reactor and to order an interim shutdown immediately. There is no such thing as a 100% foolproof method which would prevent a nuclear accident.

We are very concerned as it is a densely populated area and any accident would affect millions of lives. As the chairman, your decision not only concerns one of energy but ultimately it is one of health and safety for all.

Sincerely,

Sandy J. Delopoulos
