

January 8, 1981

I understand that the NRC schedule calls for public hearings on these plans after full implementation begins on April 1st. I suggest that this would be a mistake and that for NRC hearings to be meaningful, they should occur well before the last step in the planning implementation process. I am writing to ask that you move up such official public hearings to dates before April 1st, so that the public and local officials can provide input that is timely and can be fully incorporated into these plans.

Sincerely,

Alfred B. DelBello
County Executive
