Victor Glinesky, Commissioner
U.S. Nuclear Regulatory Commission
Washington, D.C. 20545

RG

Dear Sir:

I urge you as a concerned citizen, to shut down the nuclear reactors at Indian Point. Indian Point is much too close to New York City to risk to hazard to so many lives. The Indian Point reactor has consistently received ratings, and this past disastrous accident ^{should} tell us all the dangers that are just waiting to happen there.

I urge you to make a move in deference to people's lives and permanently shut down Indian Point.

Please respond to me on this matter.

Yours,

Eleanor Gaffney
