Dear Director:

Enclosed you will find correspondence I have received from Ms. Suzette Jones of Elizabeth, New Jersey.

I would appreciate any information which will enable me to respond to my constituent's inquiry. Please return the enclosed correspondence with your report.

With best wishes,

Sincerely,

  
Harrison A. Williams, Jr.

SENATOR  
N.J.

Senator Harris Williams Jr.  
Senate Office Building  
Washington, DC. 20510

Dear Mr. Williams,

I am very disturbed and disappointed at the past and present inaction of the Nuclear Regulatory Commission in demanding a review and settlement of rules for the safe operation of Nuclear Power Plants. After determining that there was sufficient cause to hold safety hearings on the Indian Point nuclear reactors, they refused to shut them down in the interim- can you honestly say that this is a good idea? Doesn't the health of the people of this country mean anything to you?

Even Harold Denton, NRC Nuclear Reactor Regulation Director, has said that the Indian Point nuclear plants are too dangerous to operate indefinitely. As you have voted to allow these plants to continue operating, the very least you can do is hold the safety hearings at the earliest possible time, in view of the recognition of some significant degree of hazard to the public. With some 10% of the United States population living within 60 miles of these reactors, speed in holding the hearings is the very least this large segment of our people deserve.

Please notify me when and where they will be held.

Sincerely yours,

*Suzette Jones*
