John Ahearne, Chairman
Nuclear Regulatory Comm.
717 H St. NW
Wash. D.C. 20006

November 3, 1980

Dear Sir;

As the majority of our supporters live in a geographical area that many of us consider threatened by the potential for an accident at Indian Point, I have been asked to write to urge that the Nuclear Regulatory Commission cease the operation of all nuclear plants in this area.

The recent flooding of Indian Point II and the subsequent decision by the Con Edison Company to attempt to pass the cost of this incident on to consumers, is only the last in a series of indicators that nuclear energy at this facility is neither safe nor economical.

Respectfully,

John Talbutt

Coordinator,
