November 7<sup>th</sup> 1988

To Commissioner Aheane:

Mr. Stello said that Con Ed was not incompetent - They could run a nuclear reactor. In reference to the 100,000 gallon leak he said they knew they had a problem. The fact is they did not know they had a problem since the water was discovered by accident.

Please, before it is too late, revoke Con Ed's license to run that reactor.

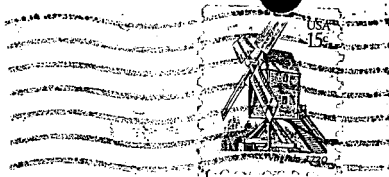

Sasny is not much better. H  
8105010158

would be so wonderful if  
Lata were closed and this  
state began a trend of  
developing solar, cogeneration  
and cleaner coal burning  
facilities.

You know as well as I, that  
there is no answer to the  
wastes, although I've heard  
many proposals. Let's stop  
producing more!

Sincerely,  
Dorothy Neuman
