

Oct. 25, 1980

John Ahearn:

Dear Sir:

As a chairman of the Nuclear Regulatory Commission, I am writing this to you to ask how much longer are we, the average citizenry of this country, to put up with all this potential danger from existing nuclear plants?

I refer at this time to the damaged plant of Con Ed. at Indian Point? what insurance do we have to protect ourselves from damaging effects? I, as a mother of future generations, am pleading with

81050 10 240

you to see to it that these
damaged plants do not reopen
to further contaminate the
American people -
