March 12, 1970

J. P. O'Reilly, Chief, Reactor Inspection & Enforcement Br.,
Division of Compliance, Headquarters

CONSOLIDATED EDISON COMPANY (INDIAN POINT 2)
DOCKET NO. 50-247

The attached report of inspection visits to the subject facility
on January 22 and February 6 and 11, 1970, is forwarded for
information.

With this report we have completed our review of Con Ed's
investigation into the previous pipe allegations and have
concluded that it was adequate. This matter is considered
resolved.

Our inspector reiterated our concern regarding the lateness of
preoperational procedure development. This matter will continue
to receive close follow up by us.

We note that Con Ed is actively developing their status with
regard to meeting the requirements of Table A (reactor coolant
pressure boundary NDT). They have been made aware of the
preferred method of processing their findings.

R. T. Carlson
Senior Reactor Inspector
