J. P. O'Reilly, Chief, Reactor Inspection and Enforcement Branch,
Division of Compliance, HQ

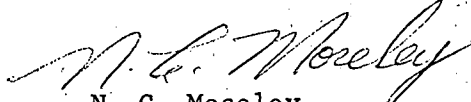

CONSOLIDATED EDISON COMPANY (Indian Point No. 2)
DOCKET NO. 50-247

The attached report of a visit to the subject facility on March 26 and 27, 1970 is forwarded for information. No new problems were identified.

Subsequent to the inspection, the assigned reactor inspector and senior reactor inspector telephoned Mr. William Cahill, Vice President of Con Ed to discuss our concern about the apparent lateness in preparing preoperational testing procedures. Mr. Cahill was responsive to our concerns and stated that he would pursue the matter within Con Ed. The assigned inspector will follow this area closely in future inspections.

A number of the items identified in the In-Depth Quality Control Inspection have been resolved. Progress is being made in resolving others.

The most recent estimate of the core loading date is September 7, 1970.

N. C. Moseley
Senior Reactor Inspector
