UNITED STATES  
ATOMIC ENERGY COMMISSION  
WASHINGTON, D.C. 20545

July 19, 1972

R. C. DeYoung, Assistant Director for PWR's, L (2)

CONSOLIDATED EDISON COMPANY (INDIAN POINT 2) - DOCKET NO. 50-247

Enclosed for your information is a report of our investigation of allegations made by Mr. Harry K. Brill, President, PECor Division, Pennsylvania Engineering Corporation, concerning potential effects on plant safety of fabrication defects in certain Class I structures and components supplied by PECor for the Indian Point 2 reactor. PECor was a second tier subcontractor to United Engineers and Constructors, Architect-Engineers for the Indian Point 2 facility. Mr. Brill's allegations were discussed in his letter to Mr. L. Manning Muntzing, Director of Regulation, dated March 14, 1972.

Mr. Brill qualified the allegations presented in his March 14, 1972 letter during the course of the Indian Point 2 Hearing (deposition taken on April 20, 1972) and stated that his concern was limited to the reactor pressure vessel support ring and the steam generator support shoes. Then, at the evidentiary hearing held on May 17, 1972, Mr. Brill testified that, after reviewing the results of the investigations conducted by Regulatory Operations and the licensee, he no longer had any concerns relating to the safety of structures fabricated by his company.

Based on the results of our investigation and our independent evaluation of the subsequent modifications to components fabricated by PECor, we have concluded that the installed structures are adequate in terms of the original design criteria. Accordingly, we consider this matter closed.

A handwritten signature in black ink, appearing to read "R. H. Engelken", is positioned above the typed name.

R. H. Engelken, Assistant Director  
for Inspection and Enforcement  
Directorate of Regulatory Operations
