Noel Burkhead, USGS

Centrarchus macropterus (*Lacepède, 1801*)

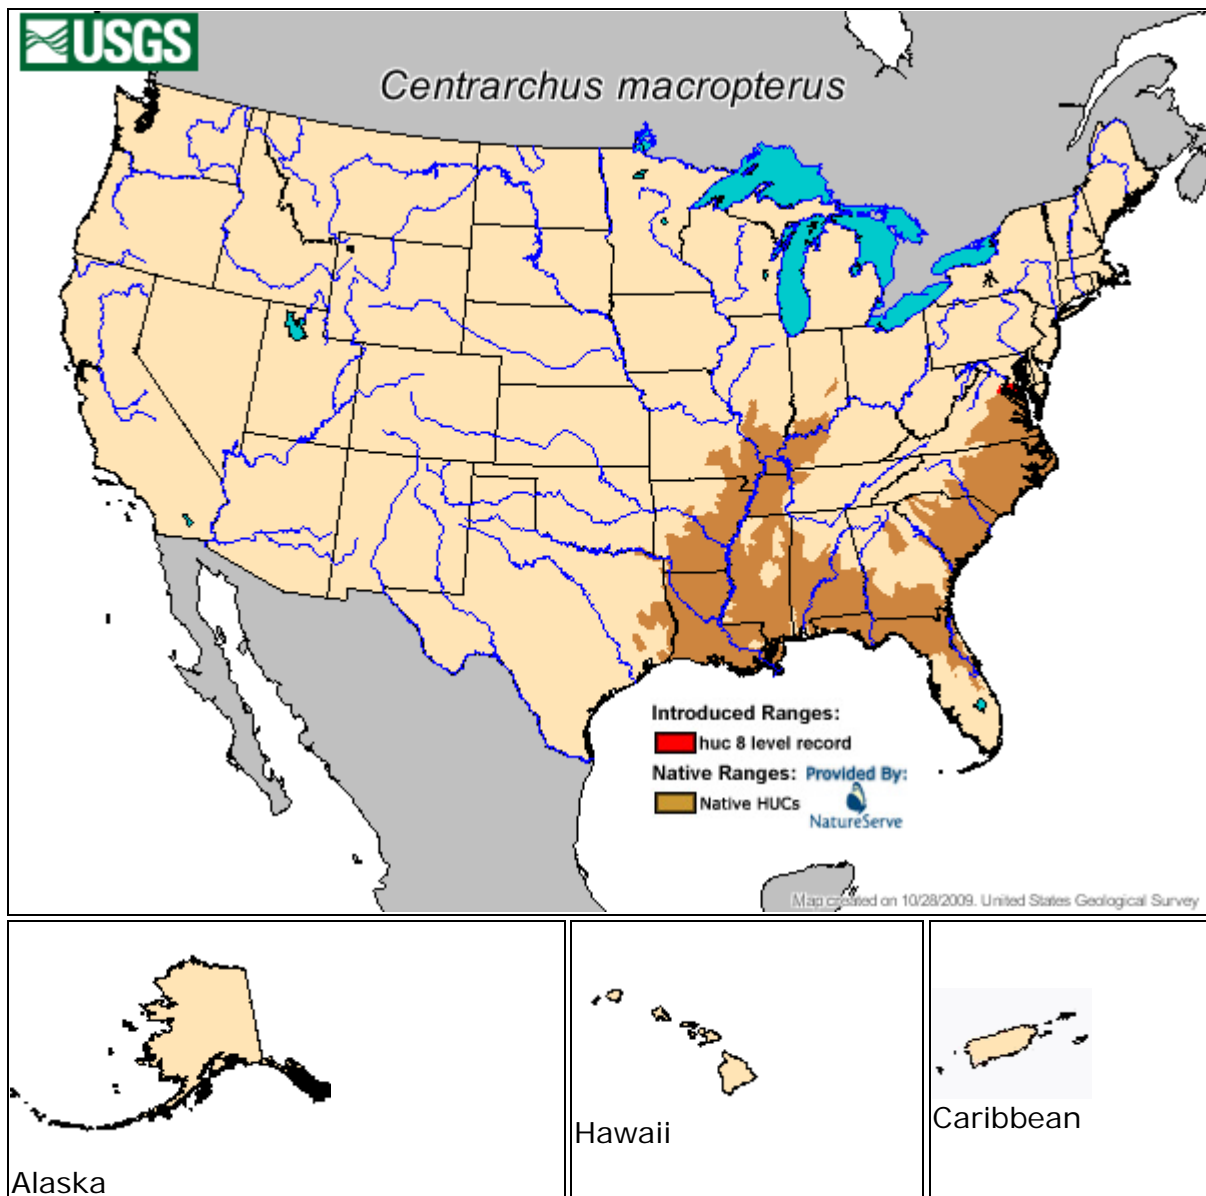

Common Name: flier

Taxonomy: available through  ITIS

Identification: Hubbs et al. (1991); Page and Burr (1991); Etnier and Starnes (1993); Jenkins and Burkhead (1994).

Size: 19 cm.

Native Range: Coastal Plain from Potomac drainage, Maryland (introduced), to central Florida and west to Trinity River, Texas; north in former Mississippi Embayment to southern Illinois and southern Indiana; above Fall Line in southern Indiana, southern Illinois; rarely elsewhere.

Interactive maps: [Continental US](#), [Alaska](#), [Hawaii](#), [Caribbean](#)

Nonindigenous Occurrences: Collected from a farm pond in **Maryland** in St. Marys County in the lower Potomac drainage prior to 1981 (Lee et al. 1981; Jenkins and Burkhead 1994).

Means of Introduction: Probably stocked, either intentionally or as stock contamination. Lee et al. (1981) questioned the flier's native status in Maryland. Jenkins and Burkhead (1994) stated that if it is native to the Potomac River in Maryland, it should have been found in the Virginia portion of that river as well (it was not).

Status: Reported from Maryland.

Impact of Introduction: Unknown.

Remarks: None.

Native Transplant

Specimen ID	35143
Group	Fishes
Genus	Centrarchus
Species	macropterus
Common Name	flier
State	MD
Locality	farm pond in MD in the lower Potomac drainage
HUC8 Name	Lower Potomac
HUC8 Number	2070011
Latitude	38.4199214
Longitude	-76.867028
Lat-Long Source	Calculated by GIS
Lat-Long Accuracy	Centroid
Map	 <p>Map data ©2009 Google - Terms of Use</p> <p>Map Satellite Hybrid</p>
Year	1981
Year Accuracy (Specimen)	Actual
Primary Pathway	stocked for sport
Status	collected
Reference #1	Ref. Number 706
	Author Jenkins, R.E., and N.M. Burkhead.
	date 1994
	title Freshwater Fishes of Virginia.
	publisher American Fisheries Society, Bethesda, MD.

pages 1079 pp.
