Subject: site visit

Dara - here's a list of what we're hoping to see on the site visit next week.

Tour/observation of the:

- major onsite buildings/structures (e.g., reactor, auxiliary, turbine, spent fuel, and emergency diesel generator buildings, as time permits)
- postulated fission product release locations
- onsite meteorological data collection system and tower
- site topography (onsite; our surrounding area tour will be self-guided)

Please call me and let me know whether this is feasible and we can discuss specifics as necessary. I'd anticipate that we would have a brief (likely no more than 30-minute) kick-off type meeting at the start of the day to review the tour location and purpose.

I think we should be able to conclude after 4-6 hours on site, but I'd like to confirm that with you.

Thanks!

Drew
