SUBJECT: CLOSURE OF FIRE PROTECTION EXEMPTION DATABASE

The purpose of this memorandum is to document the closure to Task 7, "Exemption Database," of SECY-08-0171, "Plan for Stabilizing Fire Protection Regulatory Infrastructure." The Government Accountability Office (GAO) Report 08-747, "Nuclear Safety: Nuclear Regulatory Commission's Oversight of Fire Protection at U.S. Commercial Nuclear Reactor Units Could Be Strengthened," June 2008, included a recommendation to, "develop a central database for tracking the status of exemptions." The Chairman responded regarding the GAO report in a letter to Congress dated, September 11, 2008, committing to, "develop a centralized database of fire protection exemptions for operating nuclear reactors." The staff has completed Commission commitment, "Developing guidelines for updating this exemption database" for Task 7.

Enclosure 1 of this memorandum outlines activities that the staff completed to close out Task 7. As described in enclosure 1 of this memorandum, the database was created and put in Agencywide Documents Access and Management System (ADAMS) December 2009, located at ML093560120. For convenience, enclosure 2 of this memorandum is the updated exemption database. A link to the exemption database can be found on the external fire protection webpage located at '<http://www.nrc.gov/about-nrc/fire-protection.html>'.

Having exemption documents in ADAMS makes the exemption information available both to the regional and site inspectors and also to public stakeholders. Exemptions for decommissioned plants were not included in the database. The Fire Protection Stabilization Plan will be updated during its next revision to show this task as completed.

## **TASK 7 COMMISSION COMMITMENTS**

### **1. Collect Data on Fire Protection Exemptions (6/2009)**

*Related Documents*                      Closure Memo – ML091760888

To meet this Commission commitment, the Office of Nuclear Reactor Regulation (NRR) staff found past Title 10 *Code of Federal Regulations* Part 50, Appendix R (Appendix R) exemptions based on the FIRE DAT database. FIRE DAT is a database of fire protection exemptions created to support NRR staff reviews. The FIRE DAT database was kept current until 2002. As part of Task 7, NRR staff created a new database with information from the FIRE DAT database and the post-2002 exemptions which were already in Agencywide Documents Access and Management System (ADAMS). To ensure confidence that FIRE DAT was kept current prior to 2002, ADAMS Legacy Library was searched for any exemptions not included in FIRE DAT. In addition to searching ADAMS Legacy Library, NRR staff was asked to review the compiled list of exemptions for any missing documents. The FIRE DAT database is non-public however; FIRE DAT is superseded by the new exemption database and updated ADAMS profiles.

Numerous exemptions referenced in the FIRE DAT database had not been uploaded into ADAMS because they predated ADAMS. Exemptions that were not in ADAMS were scanned from the file copies, uploaded into ADAMS and profiled. The staff has identified 143 approved exemption documents that contain Appendix R exemptions. In most cases, there were multiple exemptions in each document. NRR staff completed Sensitive Unclassified Non-Safeguards Information (SUNSI) reviews on documents added into ADAMS, and these exemptions are publicly available. The staff issued a memorandum closing out Commission commitment, "Collect Data on Fire Protection Exemptions," in June 2009, and can be found in ADAMS as ML091760888.

### **2. Complete Development of Database (12/2009)**

*Related Documents*                      Exemption Spreadsheet: ML093570183  
Initial Exemption Database: ML091760888  
Updated Exemption Database: Enclosure 2 of this memo

To meet this Commission commitment, NRR staff placed the exemption documents into a folder in ADAMS. This folder was then used to create a Microsoft Excel spreadsheet of information, and is available to the Nuclear Regulatory Commission (NRC) staff at ML093570183. The Microsoft Excel spreadsheet is not publicly available at this time because in ADAMS an Excel spreadsheet cannot be made into a Portable Document Format. However, the only information from the Microsoft Excel spreadsheet not included in the enclosed database are profile keywords and Docket Numbers. The keywords are listed below and the Docket Numbers coincide with Plant Names, which are given in the database. The Microsoft Excel spreadsheet is searchable by Plant Name, Accession Number, Document Date, Title, and Docket Number.

Information from the Microsoft Excel spreadsheet was then used to create the exemption database. Microsoft Access was used as a tool to generate the database, which is enclosure 2 of this memorandum. Since the information is directly from ADAMS, typographical errors exist

in the spreadsheet and database. These errors are formatting errors in the titles of the documents including titles in all caps, odd spacing, etc.

In addition, ADAMS profiles have been updated and these documents can now be searched by exemption document type and keywords. For example searching a keyword of "Emergency Lighting" with the document type "Exemption from NRC Requirements" will bring up exemptions relating to emergency lighting. Below is a list of keywords that were added to ADAMS. The staff issued a memorandum closing out Commission commitment, "Complete Development of Database," in December 2009, and can be found in ADAMS as ML093560120.

*Keywords*                    20 Feet Separation, Automatic Fire Detection System, Automatic Fire Suppression System, Circuits, Cold Shutdown 72 Hours, Emergency Lighting, Fire Barrier Separation, Fire Dampers, Fire Doors, Fixed Fire Suppression System, Hot Shutdown, Operator Manual Actions, RCP Oil Collection System, Scheduler, Unprotected Structural Steel

### **3. Establish Procedures for Updates (4/2010)**

*Related Documents*            Procedures to Update Exemption Database Non-Public: ML100140081

To meet this Commission commitment, NRR staff created procedures on how to update the current database, correct an exemption profile, and how to update the exemption spreadsheet. ML100140081 contains the procedures listed above and is for internal guidance and therefore, is not publicly available. The staff issued a memorandum closing out Commission commitment, "Establish Procedures for Updates," in April 2010, and can be found in ADAMS as ML100140081.
