

UNITED STATES OF AMERICA
NUCLEAR REGULATORY COMMISSION

In the Matter of)

CONSOLIDATED EDISON COMPANY)
OF NEW YORK, INC.)
(Indian Point Station,)
Unit No. 2))

Docket No. 50-247

APPLICATION FOR AMENDMENT
TO OPERATING LICENSE

Pursuant to Section 50.90 of the Regulations of the Nuclear Regulatory Commission ("NRC"), Consolidated Edison Company of New York, Inc. ("Con Edison"), as holder of Facility Operating License No. DPR-26, hereby applies for amendment of the Technical Specifications contained in Appendix A of that license. Specifically, Con Edison requests the addition, modification or deletion of Technical Specifications 3.8.B.4, 3.8.C.2, 3.8.D.1, 3.8.D.2, 3.8.D.3, 3.8.E, 5.4.2.B, 5.4.3 and Table 4.1-2. These changes are to accommodate the proposed spent fuel storage capacity expansion.

The specific proposed Technical Specification revisions are set forth in Attachment A to this Application. A Licensing Report including applicable safety analyses and the No Significant Hazards Consideration Evaluation of the proposed changes is set forth in Attachment B to this application. This assessment demonstrates that the proposed changes do not represent a significant hazards consideration as defined in 10 CFR 50.92(c).

As required by 10 CFR 50.91(b)(1), a copy of this application and our analysis concluding that the proposed changes do not constitute a significant hazards consideration are being provided to the appropriate New York State official designated to receive such amendments.
