U.S. NRC, Region III  
2443 Warrenville Road, Suite 210  
Lisle, IL 60532-4352

January 19, 2010

Mr. Null:

Enclosed is our response pertaining to your request for clarification per our conversation on January 13, 2010 to item 1 in our letter dated December 14, 2009 (for our application for a commercial radiopharmacy license—control number 318192.) "Under the supervision of an authorized nuclear pharmacist," was added as we discussed for the chemical synthesis of radioisotopes.

We are still in the process of evaluating our need for the financial assurance and decommissioning funding plan. We have received conflicting data regarding isotopes present with our cyclotron and are doing extensive research to clarify what isotopes we actually possess at any point in time. I will keep you updated with our progress.

I hope you find everything in order. If you have any questions, please feel free to contact me at Spectron mrc, 574-271-2800.

Sincerely,

A handwritten signature in black ink, appearing to read "Kirk Rozycki", written over a horizontal line.

Kirk Rozycki, R.Ph.  
Radiation Safety Officer

RE: Application for a commercial radiopharmacy

Mr. Null:

The following response pertains to your request for clarification or additional information per our conversation on January 13, 2010 to item 1 in our letter dated December 14, 2009.

1. Please delete our request to have the following individuals as authorized users from our response dated September 30, 2009:
  - a) Zachary Reichert
  - b) Erin Smeltzer
  - c) Robert Beeler
  - d) Scott Minor

The following individuals (non-pharmacists) are to also be authorized users for this license:

- a) Robert Galloway
- b) Mark Hiatt
- c) David Trump

These individuals may use any sealed source, F-18, and/or N-13 in the required quantities (up to curie amounts) for performing leak tests, daily, quarterly, and annual instrumentation testing, quality assurance testing, chemical synthesis of radioisotopes under the supervision of an authorized nuclear pharmacist, routine and planned maintenance, repair, and/or validation testing on the chemical synthesis units, waste management and disposal, and clean up of radioactive spills.

David Trump may also handle and use for research and development any radioactive material listed on our license with prior approval from the radiation safety officer.
