Re: Consolidated Edison Company
of New York, Inc.
Indian Point Station Unit No. 2
AEC Docket No. 50-247

Gentlemen:

There is enclosed a copy of a document entitled "Answers of Applicant to Questions Raised by Atomic Safety and Licensing Board on March 24, 1971 - Part III". This document contains Applicant's answer to a question raised by Mr. Briggs relating to the functioning of the emergency core cooling system for Indian Point Unit 2.

8111111009 710713
PDR ADOCK 05000247
G PDR

There is also enclosed a document entitled "Additional Testimony of Applicant Concerning Emergency Core Cooling System Performance." This document has been prepared in response to the AEC's interim policy statement entitled "Criteria for Emergency Core Cooling Systems for Light Water Power Reactors" (36 Fed. Reg. 12247, June 29, 1971) for the purpose of demonstrating that the emergency core cooling system for Indian Point Unit 2 complies with the AEC's criteria. It also contains information responding to a letter received from the Regulatory Staff dated July 7, 1971 requesting certain additional information concerning the performance of the emergency core cooling system.

Applicant intends to offer both of these documents in evidence in this proceeding under the sponsorship of Mr. James Moore of Westinghouse Electric Corporation.

Very truly yours,
