50-247

Mr. Frederick H. Warren, Director
Office of Advisor on Environmental Quality
Federal Power Commission
441 G Street, N. W.
Room 4007
Washington, D. C. 20426

ENVIRON, FILE (NEPA)

Dear Mr. Warren:

On November 4 we requested your assistance in our review of Consolidated Edison's request for interim authorization to operate its Indian Point 2 plant at up to 90% of full power. Since that time we have learned that plant operation will be delayed for at least several months as a consequence of a fire in the plant's Primary Auxiliary Building.

We suggest that you terminate work on Con Ed's request since we now plan to complete the on-going NEPA review in that time period. Accordingly, we are withdrawing our request for your assistance in the review of the interim authorization. When our Draft Environmental Statement on Indian Point 2 is prepared it will be sent to the FPC for your comments.

Sincerely,

Original signed by:
Roger S. Boyd

Roger S. Boyd
Assistant Director
for Boiling Water Reactors
Division of Reactor Licensing
