

September 8, 1972

Note to L. Manning Muntzing

I am enclosing for your review a copy of the Summary and Conclusions section for the Consolidated Edison of New York, Inc., Indian Point Unit 2 plant. This section has been reviewed by my staff as well as Oak Ridge National Laboratory's environmental staff, and all are in agreement with the position. I am also enclosing a memo transmitting the Summary and Conclusions section to the Commission.

Chairman Schlesinger called my office this morning, and in my absence, he called Dan Muller personally and inquired as to the status of the Indian Point Unit 2 Final Statement. Dan told him that we hope to have the Summary and Conclusions section to the Commission late today or Monday, and if all goes well, publish the Statement during the week of September 17.
