MADISON, WISCONSIN 53706

March 27, 1972

Mr. L. Manning Muntzing
Director of Regulation
U.S. Atomic Energy Commission
Washington, D.C. 20545

Dear Mr. Muntzing:

Our Nuclear Engineering Department is developing a course in ENVIRONMENTAL ASPECTS OF NUCLEAR ENERGY for advanced undergraduate and graduate students. One of our primary goals is to introduce the nuclear engineers to both the fundamentals of the environmental sciences as they relate to nuclear power systems, and to familiarize them with some of the considerations which are involved in the siting, licensing, operating and regulating of nuclear power plants. A very convenient basis for introducing some practical information into our course offering is the environmental impact statement required under the National Environmental Policy Act. I have recently discussed the course with Dr. Walter Jordan of Oak Ridge and he suggested that I might write you about obtaining the latest information on the detailed statements on the environmental conditions for new plants. In particular he mentioned the applications for Indian Point I and II which apparently are available now and are public information. Would it be possible for us to obtain these statements as soon as possible since the course is in progress for the first time this semester? In addition I am wondering if you could indicate the status of the environmental impact statement for the Zion plant. We are using the Zion plant as a case study for the course.

I thank you in advance for all of your assistance. We hope that the training we are providing will be of some benefit to the Atomic Energy Commission in their attempts to incorporate a far wider range of environmental values and considerations in their licensing and regulation.

Sincerely yours,

W.K. Foell
Associate Professor
