*appeal*

*appeal Board*

On April 4, 1974, the Atomic Safety and Licensing Board designated to preside in the proceeding involving the facility operating license for Indian Point Nuclear Generating Plant, Unit No. 2, operated by Consolidated Edison Company of New York, issued a Decision authorizing an amendment to the license. On May 6, 1974, the Directorate of Licensing issued an amendment to Facility Operating License DPR-26. In accordance with the provisions of 10 CFR Part 50, Appendix D, Section A.11 of the Commission's regulations, we are herewith transmitting a copy of that Decision.

A Final Environmental Statement relating to the Indian Point Nuclear Generating Plant, Unit No. 2, was prepared by the Directorate of Licensing and transmitted to you by our letter of September 28, 1972. The Final Environmental Statement is deemed modified to the extent that condition 2.E of the license extends the interim operation period from May 1, 1978 to May 1, 1979, subject to certain environmental conditions for operation of the plant imposed upon the licensee during such interim operation (See pages 185-187 of the Decision).

Also transmitted is a copy of the notice of availability of the Decision which has been sent to the Office of the Federal Register for publication.

*FES 11/78*

Sincerely,

Daniel R. Muller, Assistant Director  
 for Environmental Projects  
 Directorate of Licensing
