Mr. R. B. Briggs, Director
Molten-Salt Reactor Program
Oak Ridge National Laboratory
P. O. Box Y
Oak Ridge, Tennessee 37830

In the Matter of
Consolidated Edison Company of New York, Inc.
(Indian Point Nuclear Generating Station, Unit 2)
Docket No. 50-247

Gentlemen:

Forwarded herewith for the Board's review, is the staff's revised proposed Appendix B to Facility Operating License DPR-26 (Environmental Technical Specifications Requirements) in subject proceeding.

In addition, the staff requests that Section 2D(5) of the Staff's Proposed Operating License which states that "The licensee will comply with applicable water quality standards, in accordance with Federal, State and local regulations" be deleted. The Commission has determined that this license condition is no longer required because of the independent review of environmental conditions in each case which are tailored to a particular facility. The applicant will be required to meet applicable standards by virtue of compliance with the provisions of the Technical Specifications.

Sincerely,

Myron Karman
Counsel for AEC Regulatory Staff
