

May 29, 2009

Donald J. Stebbins
Chairman, President and CEO
Visteon Corporation
1 Village Center Dr.
Van Buren Township, MI 48111

SUBJECT: VISTEON TRITIUM EXIT SIGNS

Dear Mr. Stebbins:

This letter is being sent per the telephone message that Angela McIntosh of my staff left to you on May 29, 2009.

It is the understanding of the U.S. Nuclear Regulatory Commission (NRC) that Visteon Corporation is undergoing reorganization efforts, which include the closing of some of its locations. NRC records indicate that Visteon Corporation possesses devices containing low levels of radioactive material. The radioactive material is called tritium, and it is contained within exit signs Visteon Corporation has acquired. Upon receipt of such signs, Visteon Corporation became a general licensee of the NRC pursuant to Title 10, Section 31.5 in the Code of Federal Regulations (10 CFR 31.5). It is also likely that Visteon Corporation is a general licensee in one or more of the 36 Agreement States (states which have signed agreements with the NRC to independently regulate the use of radioactive materials) which regulate these signs in their jurisdictions.

Although the tritium contained within these signs does not present a hazard when the signs are used in accordance with the manufacturer's instructions, NRC regulations nevertheless require that licensees properly account for, transfer, or dispose of the signs so that members of the public are not needlessly exposed to the low-level radiation within them.

NRC would emphasize that for any property Visteon Corporation continues to own and/or lease, or once owned and/or leased, Visteon Corporation remains responsible for tritium exit signs it has installed in such properties. Therefore, any tritium exit signs in such properties must either remain under the direct supervision of Visteon Corporation or, pursuant to the requirements of 10 CFR 31.5; Visteon Corporation must either properly transfer possession of these tritium signs or arrange for the proper disposal of such signs.

In addition, if it is discovered that any tritium exit sign is lost, stolen, missing, or damaged, Visteon Corporation or a designated representative must make a report to the NRC or to the appropriate Agreement State as required by 10 CFR 20.2201 and 10 CFR 31.5(c)(5). Reports for signs in NRC jurisdiction (which includes U.S. Possessions and Territories) should be made by calling 1-800-532-3469. Attachment 1 contains a list of the contacts in the Agreement States.

Attachment 2 is a list of tritium exit signs sold to Visteon Corporation in areas of NRC jurisdiction, and contains the name of the sign manufacturers who can provide you with a more complete inventory of signs purchased by Visteon Corporation for all jurisdictions.

Should you have any questions, please contact Angela McIntosh at 301-415-5030 or send an email to MSEA@nrc.gov.

Sincerely,

/RA/CEinberg for

James G. Luehman, Deputy Director
Licensing and Inspections Directorate
Division of Materials Safety and State Agreements
Office of Federal and State Materials
and Environmental Management Programs

Enclosures:

1. List of Agreement States
2. List of Tritium Exit Signs Sold to Visteon Corporation

Should you have any questions, please contact Angela McIntosh at 301-415-5030 or send an email to MSEA@nrc.gov.

Sincerely,

James G. Luehman, Deputy Director
Licensing and Inspections Directorate
Division of Materials Safety and State Agreements
Office of Federal and State Materials
and Environmental Management Programs
