## General Comment

Nuclear Regulatory Commission  
Dear Commissioners;  
The NRC is asking the public for input on what information or data would be useful for the agency to publish online.  
Well as an intervenor let me explain what I do. I listen in on casual conversations at fast food establishments near NRC meetings, bars while sipping on 'Shirley temple's', and while serving lunches to NRC and Licensee participants in decision making sessions where the public is excluded.  
I have used the knowledge so acquired to win a 'pro se' intervention at the Restart Hearings for the TMI#1 Restart, submitted over 500 comments which many caused rewrites of regulations at several agencies, and had 500+ 'letters to the Editor' published in 3 medias.  
I think that the more that the NRC tries to hide, the more I shall become the notorious 'Lewis Problem' to the NRC and other bought and paid for agencies of the government  
I wish that I could say,  
Respectfully submitted,  
Marvin Lewis, R. P. E. (Retired.)
