ENVIRO - FILE (NEPA)

50-247

Mr. E. G. Struxness, Director
Environmental Impact Project
Oak Ridge National Laboratory
P. O. Box X
Oak Ridge, Tennessee 37830

Dear Ed:

Please find enclosed a draft of material on radiological effects pertaining to Indian Point Unit No. 2 (Docket No. 50-247) which has been prepared by the Radiation Protection section of the Division of Radiological and Environmental Protection. This draft covers only the generalized releases from Indian Point Unit No. 2 and may be modified if detailed analysis of the proposed radwaste system changes indicates that a different set of source terms should be used. Any comments you may have will be useful for the Draft Environmental Statement.

In regard to ecological assessment of Indian Point Unit No. 2, our review of the comments of Dr. B. Ketchum of Woods Hole and Dr. R. Olgeby of Cornell University, consultants to ORNL, and of the response of Dr. P. Goodyear of ORNL presents no serious disagreement. Our views were also forwarded to you in a letter dated January 11, 1972 from Dr. J. Swinebroad of the Environmental Technical Specialist Branch of DREF.

If you have any questions, please feel free to contact us.
