Dear Mr. O'Brien

MISTRAS Group Inc. (formerly CONAM Inspection & ESI) has completed the 2nd session portion of 25% additional radiation safety audits in accordance with our agreement during the alternative dispute resolution session held on September 10, 2008.

A review of the 2nd session results of the additional audits indicated minor deficiencies which have been addressed locally. At this point we have found no issues at any location which would require an increase in the number of field audits performed above that which is required by state or federal regulations.

This concludes the two six month periods in which the 25% additional field audits have been performed.

Sincerely,

Daryl Istre
Corporate RSO
MISTRAS Group Inc.
