

APR 27 1972

Docket Nos. 50-286
and 50-247

Consolidated Edison Company
of New York, Inc.
ATTN: Mr. William J. Cahill, Jr.
Vice President
4 Irving Place
New York, New York 10003

Gentlemen:

In an effort to be more responsive to the needs of the public, the Commission has established a document room relating to your application for the Indian Point facility at the Hendrick Hudson Free Library, 31 Albany Post Road, Montrose, New York 10548 (Mrs. Kay Winter, Librarian).

We have provided instructions as noted in the enclosed letter to the librarians in charge of these document rooms. However, we believe further assistance and guidance would be useful to them and request that you have one of your representatives make periodic checks of the materials available. In particular, your representative should assure that revised and supplemental information is properly incorporated in the application and safety analysis report, and that any other amendments, reports, and letters which you have filed with us are available. It is not necessary that you actually supply these documents as we will forward them to the document room, together with the documents originated by or for AEC such as the following: AEC letters requesting additional information, letters written to you by Regional Offices of the Division of Compliance, your Environmental Report, the Draft and Final Detailed Statements and all comments thereon, Safety Evaluations, the report of the Advisory Committee on Reactor Safeguards, all Federal Register notices, orders, permits, licenses, any advice rendered by the Attorney General and matters relating to the public hearing on your application (requests for limited appearances, petitions for intervention, orders or decisions of the Atomic Safety and Licensing Board, and hearing transcripts).

If you should encounter situations where documents of this type are missing, please provide them if you have them available. If not, please telephone

 New York, New York 10003

Gentlemen:

The regulatory staff has prepared the attached draft criteria regarding industrial security. This draft material reflects preliminary thinking by the staff on this subject. It is furnished to applicants for the purposes of illustrating the scope of security planning that is considered appropriate and identifying specific aspects of security planning that should be addressed in security plans. Applicants are encouraged to use the draft criteria as a "checklist" in the preparation of security plans.

These criteria are not and should not be regarded as firm requirements of the regulatory staff; conformance with every criterion is not essential.

Sincerely,

Original Signed by
 R. C. DeYoung
