Mr. Domenic B. Vassallo
Chief, Light Water Reactors
Project Branch 191
U.S. Nuclear Regulatory Commission
7920 Norfolk Avenue
Bethesda, Maryland 20014

Dear Mr. Vassallo:

Confirming my telephone conversation with your Mr. Michael Aycock, the Power Authority's application for permission to acquire Con Edison's nuclear unit Indian Point No. 3 is based on the premise that there will be an interim period during which Con Edison will operate the plant, and that during such period of Con Edison operation the Con Edison quality assurance program as it has been approved by your agency will be fully implemented. As stated at page 2 of the application, it is the Authority's intention ultimately to operate the plant itself. In doing so it will of course implement its own approved quality assurance program.

Sincerely,

George T. Berry
