Mr. William J. Cahill, Jr.
Vice President
Consolidated Edison Company
of New York, Inc.
4 Irving Place
New York, New York 10003

Dear Mr. Cahill:

We are amending our licensing procedures to include appropriate conditions on the possession and use of byproduct, source and special nuclear material in the operating licenses of production and utilization facilities. In order to establish these conditions, the Regulatory staff must evaluate the capabilities, facilities and procedures for handling and storing byproduct, source and special nuclear material at Indian Point Nuclear Generating Unit No. 3. Accordingly, we request that you provide the information listed in Enclosure 1 to this letter as an amendment to Section 11.0 of the Indian Point Nuclear Generating Unit No. 3 FSAR. The information should be provided in the same format as shown in Enclosure 1.

Enclosure 2 is a sample addition to the Technical Specifications which will be required to be included in Appendix A to the operating license.

To maintain our licensing review schedule, we will need a response to the information requested by April 15, 1974.

Please contact us if you desire any discussion or clarification of the material requested.

Sincerely,

Original signed by
D. B. Vassallo
